*Let's Work Together to Ensure Every DeafBlind
Student is Prepared for a Bright Future!*

INTRODUCTION

The New England Consortium's (NEC) Transition for Success program is designed to support families and educational teams working with students who have combined vision and hearing loss and are between the ages of 14-22. Our ultimate goal is to provide tailored consultation and training to build the capacity of team members—including families—to effectively support DeafBlind youth throughout their high school years, ensuring they are fully prepared for post-school opportunities.
